

2021 VIRTUAL EVENT.

Americas
June 2-3, 2021

EMEA
June 22-23, 2021

APAC
July 13-14, 2021

COLLABORATE. EDUCATE. INNOVATE.

Why Attend?

Technology continues to change at an accelerated pace. Network, cloud and security experts must find a way to ensure consistent security policies from on-prem to the cloud – and across every point of access and connectivity. With visibility and automation across security policies, you can ensure that your organization remains compliant, reduces potential risk, and is spending less time on manual monitoring across multi-vendor, heterogeneous environments.

We can help you stay on top of the latest trends with insights and education around security policy management. Now in its fifth year, Tufinnovate brings together Tufin experts, customers, partners, and industry thought leaders for an interactive experience designed to enhance your skills and expand your network.

Three great reasons to register:

COLLABORATE.

Engage with network, cloud and security professionals who dedicate each day to delivering business agility without compromising security for some of the largest organizations in the world.

EDUCATE.

Learn from inspiring keynotes, case studies and breakouts. Our sessions cover Tufin's vision and roadmap, customer insights and deep technical dives, as well as topics such as Zero Trust, hybrid cloud security, continuous compliance and vulnerability management.

INNOVATE.

Use your newly gained knowledge from R&D, service experts and other Tufin users to enhance visibility and automation across your enterprise.

We look forward to seeing you soon!
